

French speaking agri-water consultant

eLEAF is an information services supplier for the agriculture, insurance and water management sector. Our information services are based on Earth Observation data that we process with our in house developed PiMapping® technology. This technology is a set of algorithms used to enrich satellite imagery. Core of this technology are our energy balance algorithms (ETlook, SEBAL and EWBMS) with which we have a leading position in the world.

We are active worldwide and work closely with partners that are at the forefront of new developments in agriculture, crop insurance and water management. For our growing clients base in the agricultural sector we are looking for a French speaking expert with experience in the use of remote sensing for agriculture or water management.

Job description

You will support our existing French-speaking clients with the implementation and use of our information services for agriculture and water management. You contribute to the expansion of our footprint in French-speaking countries by chasing opportunities and securing new clients. Your job will require frequent travelling and contact with our clients in the field. Based on your understanding of their needs you come up with new solutions. You will be working closely with other colleagues and partner organisations.

Requirements

- Master's Degree with in a for agriculture relevant field or equivalent work experience
- Professional experience the application of remote sensing technology for agriculture or water management
- Excellent communication skills and the ability to work with people from different backgrounds and cultures
- Fluent in French and English, Dutch is considered a plus
- At least 5 years work experience, preferably in an international setting
- Eligible to work in the European Union

Offer

- Plenty of room for personal growth and professional development
- An inspiring work place with motivated colleagues
- Make an impact by supporting sustainable water use and increased food production
- Good primary and secondary conditions

Application

For more information you can contact Mr. Maurits Voogt, Managing Director of eLEAF (maurits.voogt@eleaf.com). Applications containing a CV and cover letter can be submitted to Mr Voogt as well.
