

**eLEAF** is an information services supplier for the agriculture, water management and insurance sectors. Our information services are primarily derived from Earth Observation data that we process with our PiMapping® technology based on advanced Surface Energy Balance algorithms.

We offer a wide variety of solutions to our customers with which we have a leading position in the world. We work closely with partners and clients that are at the forefront of new developments to improve water use efficiency and drive the transition to sustainable agriculture.

For our Markets team we are looking for an experienced

## Agriculture / Irrigation management Consultant

As consultant you will advise and support our clients and partners worldwide with the implementation and use of our information services for agriculture and water management. Clients range from farmers, agronomists and food processors to irrigation managers and government agencies. They use eLEAF services to improve agricultural productivity and support sustainable water management. Your role is to identify client priorities, and translate those into solutions that answer to their needs. For this you will be working closely with our technical and research staff as well as partner organisations. Maintaining a client network is an important part of the job. Through this you will create new business opportunities. Regular travel abroad is expected, although all travel is currently pending due to Covid-19.

You are ambitious to translate the latest technology in practical and attainable solutions for our clients. You have a MSc in Earth Observation, Agronomy or Irrigation / Water Management, with more than 5 years of professional experience in the application of remote sensing technology for agriculture or water management. You have excellent technical and analytical skills. Good communication skills are required and the ability to work with people from different backgrounds and cultures. You are an experienced project manager who is able to lead project consortia while maintaining a clear focus and setting priorities. Fluency in English is prerequisite and fluency in either French or Dutch is strongly preferred.

This position offers plenty of interesting challenges and opportunity for professional development. You will be working in an inspiring work place with motivated colleagues who like to make an impact on sustainable water use and the improvement of agricultural production. We offer good primary and secondary benefits. Our office is located in Wageningen and you will need to be eligible to work in the Netherlands.
