

eLEAF is an information services supplier for agriculture, water management and insurance sectors. Our information services are primarily derived from Earth Observation data that we process with our PiMapping® technology based on advanced Surface Energy Balance algorithms.

We offer a wide variety of solutions to our customers with which we have a leading position in the world. We want to make our data products available in the cloud and make them accessible via (mobile) applications for both private and public parties worldwide. To realize this ambition we are modernizing our current infrastructure.

For our Operations Unit we are looking for an intermediate

Full stack developer

As full stack developer you are responsible for developing web-applications that unlock our produced data, from design to implementation. You do this in collaboration with a team of developers who are responsible for the data-production, backend infrastructure and web-applications. Together you provide clients with various ways to access our data through services and web-applications.

You are an enthusiastic developer and are not afraid of taking the initiative. You have strategic and analytical insight and enjoy taking the lead in projects. You will participate in the design, development and implementation of Fieldlook. FieldLook (https://eleaf.com/?page_id=3174) is eLEAF's state of the art platform. The FieldLook platform is service based and supports different functionalities. For example, it feeds FieldLook's Progressive Web Applications and FieldLook's API.

With at least 4 years of relevant working experience, you understand the challenges of developing high performance web-applications for data visualisations. You can independently carry out your work and take responsibility for the choices you make. Affinity with working according to Scrum and with programming languages and techniques such as JavaScript, PHP and progressive-web-apps is required. Ability to work with python and Java and being able to make apps for Windows, android and IOS is a plus. Fluency in English is prerequisite as eLEAF is an internationally operating company, with customers from all over the world and employees from many different countries.

This position offers plenty of interesting challenges and opportunity for professional development. You will be working in an inspiring work place with motivated colleagues who like to make an impact on sustainable water use and the improvement of agricultural production. We offer good primary and secondary benefits. Our office is located in Wageningen and you will need to be eligible to work in the Netherlands.

Your application has to be submitted before November 10th 2020 to Joske Borsboom: joske.borsboom@eleaf.com. Please include a motivation letter with your CV.
