

## PHP Web developer

eLEAF is an information services supplier for the agricultural, water management and insurance sectors. We offer a wide variety of satellite-based solutions to our customers, taking up a leading position in the world. We work closely with partners that are at the forefront of new developments in food security and water productivity, supporting them to find a structural solution for their challenges. We make our data products available in the cloud and make them accessible via web-based applications for both private and public parties worldwide.

### For our IT unit we are looking for a PHP Web developer

As PHP Web developer you are responsible for developing web-applications that unlock our produced data, from design to implementation. You will participate in the development on our processing components and the development of our Fieldlook platform for our clients. Aside from role development tasks, you will contribute to specific projects, creating value for our clients and our planet. As this is a key role in within eLEAF, we expect you to have a view on future developments and how they can help to create more value. This position offers plenty of interesting challenges and opportunity for professional development.

You are an enthusiastic developer and you can independently carry out your work and take responsibility for the choices you make. You have strategic and analytical insight and enjoy taking the lead in projects. With at least 5-10 years of relevant working experience and HBO degree, you understand the challenges of developing high performance web services and applications.

You are experienced in PHP 7 (preferably using a framework) and Javascript (jQuery, service workers, Ajax, Promises and IndexedDB). You are familiar with Design patterns and SOLID principles. For supporting technology, we use Git and PostgreSQL. We apply the Agile SCRUM methodology.

eLEAF is an internationally operating company, with customers from all over the world and employees from many different countries. English is the language most used among colleagues in discussions as well as in reporting and documenting, so fluency in English is a prerequisite.

We offer a challenging and diverse job, with a low-bureaucracy working environment. Our office is in Wageningen, but we offer flexible working hours partly from home, partly in the office allowing for a good work-life balance. You can expect all hardware needed to perform your duties to be provided by eLEAF. You will be working with motivated colleagues who like to make an impact on sustainable water use and the improvement of agricultural production. We offer a competitive salary and a full pension scheme. The job is considered to be full time, preferably 36-40 hour per week. Please note you will need to be eligible to work in the Netherlands.

Please submit your application as soon as possible to Joske Borsboom at [joske.borsboom@eleaf.com](mailto:joske.borsboom@eleaf.com). Please include a motivation letter with your CV.
