

eLEAF is an information services supplier for the agricultural, water management and insurance sectors. We offer a wide variety of satellite-based solutions to our customers, taking up a leading position in the world. We produce our own data products with our in-house developed models. We make them accessible via web-based applications and API's for both private and public parties worldwide. Helping organizations to become more sustainable and climate resilient, is what makes us tick.

A substantial part of our work involves project implementation. We do research projects, pilot projects for commercial clients, or demonstration projects to showcase our solutions in a certain market. Sometimes we do these projects by ourselves, but often we are part of larger consortia made up of partners all over the world. Some initiatives are publicly or privately funded, and others have a more commercial background where clients pay us directly for our data and solutions.

To help us grow our business we are looking for a:

Project Proposal Coordinator

You will be working closely together with our Business Development Manager and the leaders of our 3 business lines: Agriculture, Water & Environment, and Climate & Weather Risk. For more information on the type of services we offer please consult www.eleaf.com.

Your work will entail all facets of project acquisition with a focus on tender trajectories from a.o. European Union, ESA, Dutch Government and the like. You will actively identify new funding opportunities. You will coordinate the entire proposal process, often in close collaboration with a consortium of international partners. You will contribute to the writing of technical proposals, budget planning, partner agreements etc. and will make sure that proposals are submitted on time, adhering to the rules and regulations of the respective donors.

You will bring:

- 3 to 5 years of experience in coordinating and writing project proposals;
- Experience in tender procedures, preferably with EU/ESA/Dutch government subsidies, where you pay high attention to detail;
- Good writing skills;
- Affinity with innovations in the water, agricultural and index-insurance domain is a plus;
- Fluency in English is a prerequisite.

We offer a challenging and diverse job, with a low bureaucracy working environment. eLEAF is growing, so we offer lots of potential to grow or specialize. Our office is in Wageningen, but we offer a hybrid working culture (remote/office) allowing for a good work-life balance. You can expect all hardware needed to perform your duties to be provided by eLEAF. You will be working with motivated colleagues who like to make an impact on sustainable water use and the improvement of agricultural production. We offer a competitive salary and a full pension scheme. The job is considered to be around 32 hours per week. Please note you will need to be eligible to work and live in the Netherlands before you apply.

Please submit your application to Joske Borsboom at info@eleaf.com. Please include a motivation letter with your CV. Applications will be considered from 20 February 2023 onwards.
